

COPPER
is best

Inferior pipes and fittings may cause leaks, damaging your home

Benefits of SABS copper in plumbing

- AVOID LEAKING PIPES AND FITTINGS
- EASY AND FLEXIBLE TO INSTALL
- LONG SERVICE LIFE
- RESISTS CORROSION
- DURABLE
- SOUND ENVIRONMENTAL CHOICE - RECYCLABLE

When it comes to quality, Copper is the answer. There are so many reasons why copper is the best choice for your plumbing system.

Know what you are buying

For the past decade or two, other material manufacturers have entered the home plumbing market. Some builders are driven by competition to cut costs and accept inferior alternatives. It may take years of use to prove their lack of wisdom. Copper has a long-term proven performance record. It is virtually maintenance free.

Installation

- Use only SABS approved copper pipes and fittings.
- Make sure you employ the skills of a qualified plumber.

Investing in SABS approved copper piping, you can avoid:

- Wasting of water - increased water bills
- Damp damage to buildings
- Growth of mold and mildew
- Costly insurance claims and increased premiums

Adhering to the rules will ensure that your copper tubing will give you a lifetime of trouble-free water supply and protect you and your family, as copper kills 99% of all known bacteria in the water supply.
